

Internet job vacancy report

June 2026 | Economic brief

The Commonwealth Jobs and Skills Australia (JSA) Vacancy Report is based on a count of newly lodged online job advertisements in June 2026 on Seek, CareerOne, and Workforce Australia. Unless stated otherwise, all data are reported in trend terms.

Internet vacancies (trend)	NT	Aust
Monthly change	↓ 1.2%	↓ 0.7%
Year-ended change	↓ 7.8%	↓ 3.6%

Northern Territory (trend)

Internet jobs advertised in the Territory declined by 1.2% in June 2026. The largest declines were in the categories of 'community and personal services' (down by 4.1%) and 'sales' (down by 2.1%), while the only increase was in 'machinery operators and drivers' (up by 3.5%) (Chart 1).

The Territory reported the largest decline of the jurisdictions, which otherwise ranged from a decline of 1.1% in New South Wales to an increase of 0.3% in Western Australia. Nationally, the number of new internet jobs advertised declined by 0.7%.

Internet jobs advertised in the Territory declined by 7.8% in year-ended June 2026. The largest declines were in the categories of 'sales' (down by 14.9%) and 'professionals' (down by 9.9%), while the only increase was in 'labourers' (up by 1.0%).

The Territory reported the second largest decline of the jurisdictions, which ranged from a decline of 7.9% in the Australian Capital Territory to an increase of 2.3% in South Australia. Nationally, the number of internet jobs advertised declined by 3.6% (Chart 2).

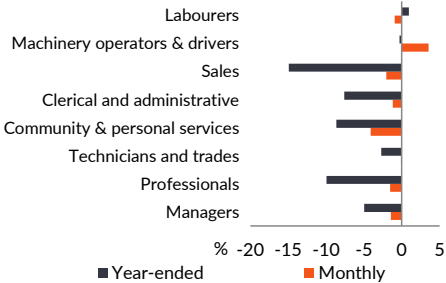

Regional vacancies (original)

JSA reports regional jobs advertised data in original terms, and as a three-month moving average, though seasonal variations remain.

Internet jobs advertised in the Darwin region declined by 10.6% in year-ended June 2026 (Chart 3), with 'sales' (down by 18.0%) and 'clerical and administrative' (down by 17.2%) reporting the largest declines.

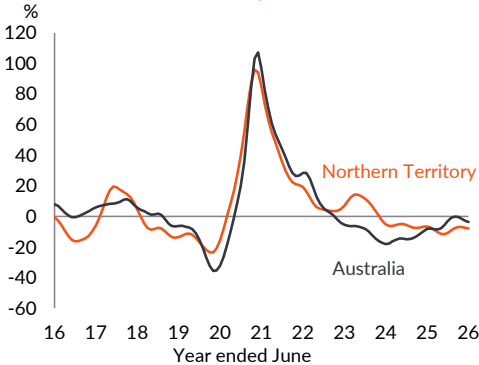

Internet jobs advertised across regional Northern Territory increased by 9.4% in year-ended June 2026, with 'labourers' (up by 26.9%) and 'managers' (up by 13.4%) reporting the largest increases.

Term	Definition
Monthly change	Compares the latest month with the previous month
Year-ended change	Compares the latest month with the same month last year
Trend	A trend series is a seasonally adjusted series that has been further adjusted to remove irregular effects and 'smooth' out the series to show the overall 'trend' of the data over time.

The Department of Treasury and Finance has updated the terminology used in the economic brief publications when referencing growth. The table below outlines the changes to terminology. This is a terminology update only and does not impact the definition or growth calculation.

Updated terminology	Prior terminology
Year-ended change	Annual change

Caution is advised when using monthly data for the Territory, as it is often derived from small samples and can be highly volatile. Although due care has been exercised in preparing this material, no responsibility is accepted for any errors or omission.

JSA advises the sum of the categories in trend terms may not equal the reported total due to the methodology behind the trend data series.
