Careers in Treasury

Apprenticeships

Considering an Apprenticeship?

Do you want to...

- combine training and employment?
- get a head start in your chosen career path?
- achieve a nationally recognised qualification with desired skills to match?

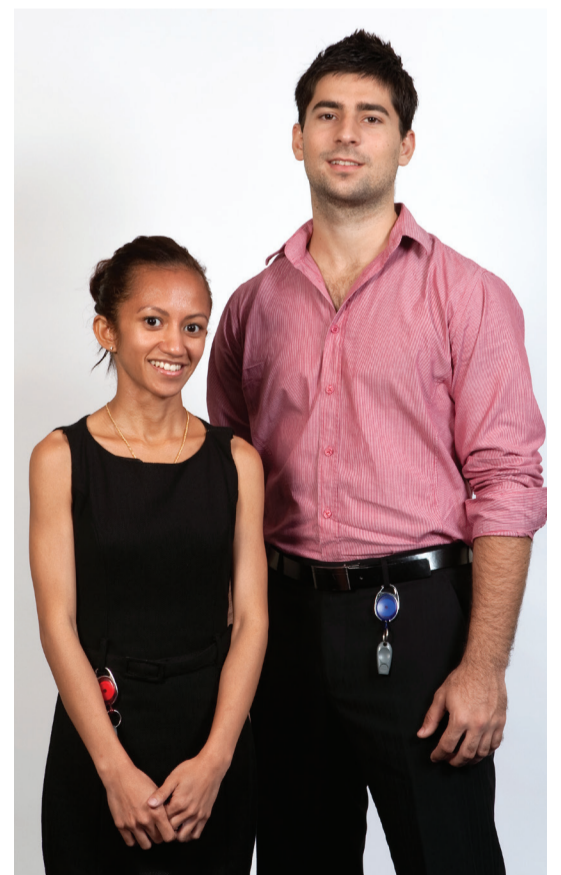

Why not join Treasury?

Not only will you be working in a professional environment, you will also gain insights into how government works and how decisions about major projects affecting the Territory are made.

Treasury apprentices rotate between business areas so they can experience the various components of Treasury business, learn new skills and get a real taste for corporate life.

There are no long-term commitments because you will be employed on a 12 month fixed period contract, although we often offer ongoing employment to our apprentices who excel during their apprenticeship and because they don't want to leave!

An apprenticeship at Treasury means you can train in a specialised area, work in a fun environment with great people and earn money at the same time!

2011 apprentices Steny Bartlett
and Theo Rossides
