

Unless stated otherwise, the following provides a summary of Deloitte Access Economics' (DAE) forecasts published in its Business Outlook March quarter 2018 report.

Economic Growth

Economic Growth Forecasts	NT	Aust
2017-18 (estimate)	↑1.8%	↑2.8%
2018-19 (forecast)	↑2.3%	↑3.2%
2019-20 (forecast)	↑3.3%	↑2.9%
5 year average annual growth rate (2017-18 to 2021-22)	↑2.9%	↑3.0%

2017-18

DAE estimates the Territory economy to grow by 1.8 per cent in 2017-18 (Chart 1). Growth is expected to be underpinned by private equipment investment, and household consumption. This is expected to be partly offset by a decrease in private engineering and commercial investment and private housing investment (Chart 2).

The Territory is expected to have the lowest economic growth of all jurisdictions in 2017-18, which range from an estimated 2.1 per cent in the Australian Capital Territory to 3.1 per cent in South Australia. Nationally, the economy is expected to grow by 2.8 per cent in 2017-18.

Outlook

DAE forecasts the Territory economy to grow by an average of 2.9 per cent per annum over the five years to 2021-22. This is the third highest economic growth forecast of all jurisdictions, behind Queensland and Victoria. In other jurisdictions, the forecast five year average economic growth ranges from 2.3 per cent per annum in South Australia and Tasmania to 3.3 per cent per annum in Queensland. DAE forecasts the national economy to grow by an average annual rate of 3.0 per cent over the five year period.

DAE notes that despite the outlook for future major project activity to be subdued, exports are expected to be a key driver of Territory economic growth, as the Ichthys liquefied natural gas (LNG) project transitions to the production and export phase (Chart 3).

Territory economic growth over the five years to 2021-22 is expected to be supported by:

- international goods exports, which are forecast to strengthen to an average growth rate of 20.7 per cent;
- private equipment investment, at an average growth of 3.2 per cent;
- private housing investment, with an average growth rate of 2.8 per cent; and
- private consumption, with an average growth rate of 2.6 per cent per annum.
