CommSec State of the States is a quarterly publication that assesses the overall economic performance of each jurisdiction based on eight key indicators. Economic performance is measured in terms of each jurisdiction's change relative to their respective 10 year average (or 'normal') level for each economic indicator, rather than comparing economic performance across jurisdictions. The Territory's 10 year average includes record levels of construction and investment activity, which may affect the assessment of some indicators.

Overall performance

The Territory remained the weakest performing economy of all the jurisdictions in terms of overall economic performance. The Territory ranked seventh for economic growth, however was ranked last on the other seven indicators. The Territory economy continues to face challenges as resources projects transition into the export phase.

Economic growth

Gross state product (GSP) is the preferred measure of a state's economic growth. However, GSP data is not available on a quarterly basis and therefore state final demand (SFD) plus trade statistics in nominal terms are used, which may not produce an accurate or comparable measure of overall economic performance compared to GSP.

The Territory was ranked seventh in terms of economic growth, with current output 14.3 per cent above the decade average level (Chart 1). In other jurisdictions, the difference in growth compared to the decade average level ranged from 14.2 per cent in Western Australia to 26.6 per cent in Victoria.

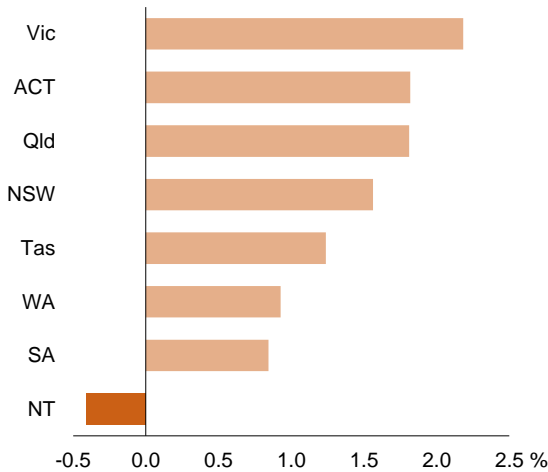

Retail trade

Performance is measured using inflation-adjusted retail trade in trend terms, with March quarter 2019 data being the latest available. The Territory ranked last for retail spending in the March quarter 2019, 1.7 per cent below the decade average level (Chart 2). Victoria was ranked first for retail spending (16.6 per cent above their decade average), supported by population growth, job security, infrastructure building and low unemployment.

Unemployment

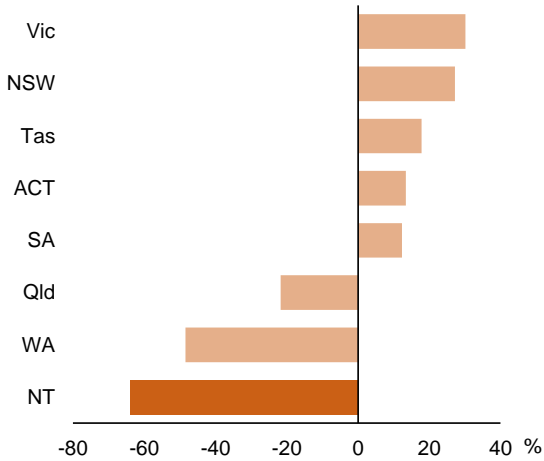

Based on June 2019 data, trend unemployment in the Territory was at 4.6 per cent, 16.7 per cent above the decade average level (Chart 3). Victoria was ranked first at 16.5 per cent below the decade average level with trend unemployment at 4.7 per cent.

Population growth

CommSec compares each jurisdictions' current annual rate of population growth with the average over the past decade. In the December quarter 2018, the Territory was the only jurisdiction to record an annual decline (ranked last), down 0.4 per cent, and 135.9 per cent below the decade average level. Tasmania was ranked first with an annual population growth 114.0 per cent above the decade average level. Victoria had the highest annual growth rate, up 2.2 per cent, and 4.8 per cent above the decade average level (Chart 4).

Construction work done

CommSec measures the total amount of residential, commercial and engineering work completed in trend terms during the March quarter 2019, compared with the decade average level. The Territory ranked last in the March quarter 2019 for construction work done, being 63.9 per cent below the decade average level (Chart 5). Victoria retained first position, with construction work done 30.1 per cent above its decade average level.

Equipment investment

The Territory was ranked last in equipment investment in the March quarter 2019, 25.4 per cent lower than the decade average level. Tasmania was ranked first, being 35.2 per cent above on the decade average level.

Dwelling commencements

CommSec measures the trend number of dwelling commencements in the March quarter 2019, compared to the decade average level. The Territory was ranked last in terms of dwelling commencements in the March quarter 2019, 60.0 per cent below decade average level (Chart 6). New South Wales is in first position, being 14.9 per cent above the decade average level.

Housing finance commitments

The measure used by CommSec for housing finance is the trend number of housing finance commitments for owner occupation in May 2019, compared to the decade average. Trend housing finance commitments in the Territory in May 2019 were 29.6 per cent below the decade average level, the weakest of the jurisdictions. Tasmania is in first position (up 11.3 per cent) followed by the Australian Capital Territory (up 8.6 per cent) and Victoria (up 1.9 per cent) on their respective decade averages.
