

Monthly consumer price index

National result

The national consumer price index (CPI) increased by 0.4% in August 2026, to be 4.0% higher in year-ended terms.

The largest contributors to the year-ended result were:

- housing (up by 5.7% contributing 1.24 percentage points (ppt)), mainly driven by utilities
- transportation (up by 5.6% contributing 0.64 ppt), mainly driven by private motoring reflecting the cessation of fuel excise relief
- food and non-alcoholic beverages (up by 3.0% contributing 0.52 ppt), mainly driven by meals out and take away foods.

National trimmed mean CPI increased by 0.2% in the month, to be 3.6% higher in year-ended terms (Chart 1). The RBA forecasts the national trimmed mean to increase 3.3% in the year-ended December quarter 2026.

Term	Definition
Consumer price index	The consumer price index tracks changes in the price of a 'basket' of goods and services that is representative of expenditure by metropolitan households.

Caution is advised when using monthly data for the Territory, which is often derived from small samples and highly volatile. Although all due care has been exercised in the preparation of this material, no responsibility is accepted for any errors or omission.
